

FASHION VISION AI

ANN IMAGE CLASSIFICATION & VISUAL ANALYSIS REPORT

Generated: 11 September 2026, 10:25 PM

1. Visual Overview

File	images (1).jpg
Original dimensions	579 × 345 px
Format	Unknown
File size	38.86 KB
Brightness	125.75 / 255
Contrast	68.06

2. AI Prediction

Predicted class	Bag
Confidence	98.50%
Confidence level	Very High
Model	Artificial Neural Network (ANN)

AI-generated class description: An accessory category representing bags. The ANN identifies the uploaded image as similar to Fashion-MNIST bag examples.

Confidence interpretation: The ANN shows strong confidence in the predicted class.

3. Top-3 Classification Results

Rank	Class	Probability
1	Bag	98.50%
2	T-shirt / Top	1.04%
3	Shirt	0.37%

4. Complete Probability Distribution

Class	Probability	Visual confidence
Bag	98.50%	
T-shirt / Top	1.04%	
Shirt	0.37%	
Pullover	0.09%	
Dress	0.00%	
Coat	0.00%	
Trouser	0.00%	
Sandal	0.00%	
Ankle Boot	0.00%	
Sneaker	0.00%	

5. ANN Image Processing Pipeline

Stage	Operation	Result
1	Uploaded image	579 × 345 px
2	Orientation correction	EXIF-aware
3	Color conversion	Grayscale
4	Resize	28 × 28 pixels
5	Normalization	Pixel values ÷ 255
6	Batch preparation	(None, 28, 28)
7	ANN inference	(None, 10)
8	Decision	Bag

Processed ANN Input — 28 × 28

Normalized pixel range: 0.0549 to 0.9137

Grayscale matrix shape: (345, 579)

Final resized shape: (28, 28)

6. Model Information

Property	Value
Architecture	Artificial Neural Network
Input shape	(None, 28, 28)
Output shape	(None, 10)
Classes	10
Trainable parameters	119,306
Framework	TensorFlow / Keras

7. Professional Interpretation

The Fashion Vision AI system analyzed **images (1).jpg** using a trained ANN. The leading classification is **Bag** with a confidence of **98.50%**. The result is based on the visual patterns learned by the model from its training data after grayscale conversion, 28×28 resizing and pixel normalization.

This report is an AI model-analysis document and should be interpreted as a classification result, not as a human expert garment inspection or product-authentication certificate.
